SUMMARY

Full-Stack Developer with 1+ year of experience building responsive and scalable web applications using React.js, Next.js, TypeScript, Node.js, and Express.js. Skilled in frontend development, REST API integration, and database management with a strong focus on performance optimization, problem-solving, and building production-ready applications.

EXPERIENCE

FRONT-END DEVELOPER INTERN

Scan0 Software, Bangalore

(Feb 2025 – Aug 2025)

- Engineered 15+ responsive and reusable UI components using Next.js, React, Tailwind CSS, and TypeScript, improving cross-device compatibility and reducing frontend development time by ~30%.
- Designed and implemented 8+ user-facing pages following modern UX/UI and accessibility standards, increasing usability and improving overall user experience consistency.
- Integrated REST APIs and dynamic state management to render real-time data, enhancing application interactivity and reducing page reload dependency.

WEB DEVELOPER INTERN

RD ECom., Mumbai, Maharashtra

(Sept 2022 – Mar 2023)

- Developed and optimized responsive website interfaces using HTML, CSS, and JavaScript, improving mobile responsiveness and page usability across devices.
- Managed and maintained the company WordPress website, ensuring 99% uptime consistency and improving content management efficiency.
- Designed and customized multiple landing pages using Elementor and WordPress templates, helping align digital presence with business and marketing goals.

PROJECTS

AI-Driven Network Traffic Analysis and Visualization [GitHub Repository](#)

- Built an AI-powered network anomaly detection system using Python and Isolation Forest to identify suspicious traffic patterns and security anomalies in real time.
- Developed a full-stack monitoring dashboard using Next.js and Python with authentication and live traffic visualization for real-time threat monitoring.
- Implemented advanced filtering and drill-down analysis by IP, protocol, and timestamps, reducing investigation time during traffic analysis.
- Technologies: Python, Next.js, Isolation Forest, MongoDB, REST APIs.

Image Encrypt-Decrypt Using AES With Flask [Live](#) [GitHub Repository](#)

- Developed a secure Flask-based web application for AES image encryption and decryption with SHA-256-based key generation.
- Implemented encrypted image upload and processing workflows, improving data confidentiality and secure file handling.
- Designed a clean and user-friendly interface for encryption/decryption operations, simplifying secure image management for users.
- Technologies: Flask, Python, AES Encryption, SHA-256.

EDUCATION

ALIGARH MUSLIM

UNIVERSITY - ALIGARH

M.Sc. Cyber Security & Digital Forensics

(2023 – 2025) | CGPA: 8.04

ALIGARH MUSLIM

UNIVERSITY - ALIGARH

B.Sc. (Hons) Physics

(2019 – 2022) | CGPA: 7.771

SKILLS

Programming Languages:

JavaScript, TypeScript, Java, Python.

Frontend: ReactJS, NextJS, TailwindCSS.

Backend: NodeJS, ExpressJS, Rest APIs.

Database: MySQL, MongoDB.

Tools: Git, GitHub, Linux, Docker, OpenAI API, Rest APIs

CERTIFICATIONS

The Complete Web Development Bootcamp [\[link\]](#)

Java And C++ Complete Course for Beginners [\[link\]](#)

ADDITIONAL

Languages: Conversational Proficiency in English, Fluent in Hindi, Urdu

Hobbies:

Teaching, Learning the latest technologies and frameworks, Sports, Fitness, and Photography.
